How Online Classes Work

The Hillside School's online classes are a hybrid format of both in-class and online instruction. All online classes are 6 weeks in length, (June 17th through July 26th) regardless of the day of the week the in class meeting is scheduled. Students enrolled in an online class must attend the first mandatory meeting on June 17th, 2019. If the student cannot make the meeting, someone in place of the student can attend to receive all pertinent information to begin the online class and to convey this information to the enrolled student. The only requirements of online classes are to have access to the internet and an email account. Each class utilizes a web-based program for the course in which most of the material is accessed. In-class meetings are essential to the success of the course and students may not miss more than one in-class meeting or the student will be dropped from the class. In-class meetings are used for instruction, questions, clarifications, projects, labs, quizzes, tests and final exams. The online portion of the class is utilized for assignments and tasks as well as any of the previously mentioned items in the in-class meetings. Final exams may be given as a combination of online and in-class.
